DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, drawn to a memory device having variable state device, classified in class 365, subclass 63.
 - II. Claims 28-32, drawn to a method for storing a logical bit in a variable resistive memory, classified in class 365, subclass 46.
 - III. Claims 33-37, drawn to a method for reading a logical bit out of a variable resistive memory, classified in class 365, subclass 46.
 - IV. Claims 38-41, drawn to a method for forming a memory integrated circuit, classified in class 438.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the memory device in Invention I can be made by other making steps than that claimed in Invention IV whereas the method of making the memory device in Invention IV can be use to make other type of memory than that claimed in Invention I.
3. Inventions I and II, III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced

Art Unit: 2824

by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the memory in Invention I can be programmed and read by other methods (i.e flash, tunnel programming...) than that claimed in Invention II, III; whereas the method of storing and reading in Invention II, III can be applied with other memory types than that claimed in Invention I (i.e EEPROMS, DRAMs....)

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group IV; the search required for Group I is not required for Groups II and III, and the search required for Group II is not required for Group III, the search required for Groups II and III is not required for Group IV; restriction for examination purposes as indicated is proper.

6. A telephone call was made to Mr. Thomas J. D' Amico on 10/1/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2824

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T. Nguyen whose telephone number is (571) 272-1880.
